### **Acid Sulfate Soil (ASS) Risk**

#### **Responsible agency:**

Department of Water and Environmental Regulation

#### **Definition of Interest:**

The Department of Water and Environmental Regulation has produced Acid Sulfate Soil (ASS) risk maps for most coastal regions of WA to identify high risk ASS areas so disturbance and potential environmental damage can be avoided where possible. ASS risk areas are grouped into two classes according to the probability and depth of ASS and potential for disturbance.

#### **Affect of Interest:**

The area of interest is **categorised** into the following class or classes of ASS risk.

Note: Where more than one risk level exists at any one location within a site, the higher risk level will apply.

Please note: Where risk has been identified to a property within this report and construction has occurred on the land, contact your relevant Local Government Authority for management remediation plans relevant to your property, or for properties being purchased off the plan, contact your developer.

#### **Acid Sulfate Soil Risk Map, Swan Coastal Plain:**

**Risk Class** - 2.0

**Risk Level** - Moderate to low risk

#### **Acid Sulfate Soil Areas:**

**Risk Class** - 2.0

**Risk Level** - Moderate to low risk

- Class 1 – there is a high to moderate risk of disturbing ASS materials at this site. WA Planning Commission will impose a condition on planning proposals in Class 1 areas.

- Class 2 – there is a moderate to low risk of disturbing ASS materials at this site. However, if site characteristics or local knowledge indicate the potential presence of ASS, further investigations are recommended, particularly if excavating more than 100 cubic metres of soil or carrying out dewatering/drainage works.

WA Planning Commission (WAPC) is responsible for land use planning and land development in WA. A WAPC Acid Sulfate Soils Self Assessment Form must be submitted to the Department of Water and Environmental Regulation (DWER) before planning approval is granted.

See our website, [www.der.wa.gov.au/ass](http://www.der.wa.gov.au/ass) for more information or phone 1300 762 982.

The Department of Water and Environmental Regulation (DWER) categorises the groundwater salinity according to the salt content and its application for public drinking, irrigation, stock water etc.

**Affect of Interest:**

The salinity in groundwater in Western Australia varies considerably. This depends on many factors such as geology, topography, climate and coastal seawater intrusion.

Due to the fluid nature of ground conditions it is only possible to report on a indicative reading for the groundwater salinity that exists at this location.

If the groundwater salinity at this location is important then you should contact the closest regional office for advice on this subject.

**Groundwater Salinity:**

**TDS per milligram per litre** - 500-1000

### Mosquito-borne Disease Risk

#### **Definition of Interest:**

## 4. Details of interests that **AFFECT** this property

14

**Responsible agency:**  
Department of Health

Mosquitoes can be a serious nuisance in certain regions of Western Australia and can spread disease-causing viruses such as Ross River, Barmah Forest, Kunjin and Murray Valley encephalitis viruses.

**Affect of Interest:**

The selected area **is impacted** by the risk of mosquito-borne diseases.

Details are as follows:

**Mosquito-borne Disease Risk:**

**Risk Level** - Low or unknown risk

**Frequent high risk**

The selected area is in a region that frequently experiences problems with nuisance and disease carrying mosquitoes.

**Occasional very high risk**

The selected area is in a region that experiences severe problems with nuisance and disease carrying mosquitoes in some years, depending on environmental conditions.

**Frequent high and occasional very high risk**

The selected area is in a region that frequently experiences problems with nuisance and disease carrying mosquitoes, and severe issues are also experienced in some years depending on environmental conditions.

**Low or unknown risk**

This location has not experienced high rates of mosquito-borne disease in the past. However, the sporadic nature of mosquito-borne disease outbreaks means that this not necessarily a precise indicator of future risk. Furthermore, regions with low or no resident human population may also be classified as low risk even though there may be an undocumented high risk in the area. Finally, significant mosquito nuisance issues may still be experienced, despite a low health risk.

Residents are advised to avoid exposure to mosquitoes and minimise mosquito breeding around the home as appropriate, particularly following extreme weather events such as heavy rainfall, high tides (in coastal areas) or localised flooding that may create abnormally large areas of mosquito breeding habitat.

For information on mosquito control in your local area or to report a mosquito problem please contact your Local Government Environmental Health Officer.

For more information about mosquito management, contact the Environmental Health Directorate on (08) 9388 4999 or email [medical.entomology@health.wa.gov.au](mailto:medical.entomology@health.wa.gov.au) or see [http://ww2.health.wa.gov.au/Articles/J\\_M/Mosquito-management](http://ww2.health.wa.gov.au/Articles/J_M/Mosquito-management).

### **Native Title and Indigenous Land Use Agreements**

**Responsible agency:**  
National Native Title Tribunal

**Definition of Interest:**

Native title is the recognition in Australian law that some Indigenous people continue to hold rights to lands and waters. An Indigenous Land Use Agreement (ILUA) is an agreement about native title made between one or more native title groups and other people.

**Affect of Interest:**

Your area of interest **is within** the geographic extent(s) of the following Native Title Applications, Determinations or Indigenous Land Use Agreements (ILUAs):

IMPORTANT INFORMATION: PLEASE NOTE  
WHILE NATIVE TITLE INTERESTS MAY HAVE BEEN IDENTIFIED OVER THE AREA  
OF YOUR SEARCH, IT MUST BE NOTED THAT:

Native Title cannot generally exist over the following types of tenure:

- residential freehold;
- farms held in freehold or;
- pastoral or agricultural leases that grant exclusive possession;
- residential, commercial or community purpose leases, or
- public works like roads, schools or hospitals.

Native Title can generally only exist over the following types of tenure:

- vacant (unallocated) crown land;
- some state forests, national parks and public reserves depending on the effect of state or territory legislation establishing those parks and reserves;
- oceans, seas, reefs, lakes and inland waters;
- some leases, such as non-exclusive pastoral and agricultural leases, depending on the state or territory legislation they were issued under, or
- some land held by or for Aboriginal people or Torres Strait Islanders.

The status of a Native Title Application will determine the rights and restrictions within the boundary of that Application.
